# *Classic styles for modern living.*

---

In our Autumn 2024 release, we proudly present a collection that epitomises modern sophistication. This season, we introduce the Dartmoor collection, with a sleek and contemporary slim shaker door designed to make an impression in five high-quality, soft-touch matt finishes.

Our latest products feature a variety of chic colours and textures. The popular Portland Stone, earthy, elegant, and versatile, is now available across multiple fitted and vanity collections, alongside new woodgrain finishes such as Weathered Oak in Bowland and Cheviot, and Light English Oak in Aurelia.

Additionally, our new natural brass handle families – Antiguo, Renaico, and Morella – are thoughtfully designed to enhance the appeal of your furniture, further enriching our hardware lineup in 2024.

For those who prefer classic aesthetics, our new range of curved vanities in Pentland offers a timeless addition. Bold and traditional, these vanities combine elegance with functionality, seamlessly integrating into the wider Pentland collection.

# Vanity to Match Fitted Furniture

Our Vanity to Match Fitted Furniture collections are designed to standalone or be used to complement our larger Calypso fitted furniture range, offering versatility in your bathroom design.

This guide will walk you through the simple steps to order and assemble your vanity unit for a stylish bathroom upgrade.

## How to Order:

### Choose Your Unit:

Browse the **Vanity to Match Fitted Furniture** section of the brochure to find your perfect vanity unit. When you order using a unit kit code, all of the parts that you need for assembly are included.

### Select a Finish:

Each collection is showcased in one finish, with all available finishes listed at the top right of the collection pages. Each unit code in the **Vanity to Match Fitted Furniture** section of the brochure is followed by two asterisks (\*\*). Replace these asterisks with the finish code located at the top right of the pricing page to find the complete the code for your desired finish.

### Add a Basin:

Compatible basins are listed below each vanity and may fit slightly wider than the unit.

The sit-on basins shown are the recommended size and require a worktop. All sit-on basins are universally compatible, but ensure your chosen basin fits your unit's dimensions. Some vanity units need specific worktops, which are available on the collection pages.

For most basins with an overflow, you can change the colour of the overflow ring. For more information on basins, worktops, and overflow rings, refer to our accessories section starting on **page 164**.

### Add Accessories:

Vanity units are shown with taps, and if applicable, handles. All additional accessories can be found in our accessories section starting on **page 164**. Some collections offer additional elements to enhance the overall aesthetic or functionality of your furniture and these can be found in the collection pricing pages where available.

## Basins

Once you have selected a vanity unit you can find compatible basins listed below. Sit-on basins require a worktop and can be found on **page 196**.

## Taps and Wastes

Choose a tap to match your vanity, starting on **page 202**. All taps come with a colour-matched slotted waste.

## Worktops

If you're using a Sit-on basin, you will need a worktop. You can find compatible worktops below each vanity unit. For universal worktop options see **page 186**.

## Vanity Units

**Vanity to Match Fitted Furniture** units includes a pre-assembled carcass, along with fascias, end panels, and a plinth (if required). Simply order using one code to receive everything you need for the vanity unit.

## Handles

Choose a handle to match your vanity, starting on **page 180**. Some vanity collections have an integrated handle and don't require a separate handle.

## Accessories

Some collections have unique features such as Bowland's inset metallic profiles. These additions can offer both style and functionality to your vanity. Explore collection pages for further details on accessories.

## Assembly Instructions:

Each vanity unit comes complete with a carcass, panels, soft close fittings, and wall fixings. The pre-assembled carcass simplifies the installation process, saving you time and effort.

We recommend using a professional bathroom installer for vanity unit installation to ensure optimal results. Once the carcass is fixed to the wall, apply your fascias, end panels, plinth, basin and other accessories to complete the look of your vanity.

# Vanity Worktops

We understand that selecting the perfect worktop to complement your vanity unit can be a crucial decision in your design process. Below we've outlined the steps to help you find the ideal worktop for your vanity.

## I. Choose Your Vanity Size:

Firstly, determine the size of your vanity unit. Vanity units that fit our standard vanity worktops are categorised into three sizes: 600 Vanity, 800 Vanity and 1200 Vanity.

Some vanity units use non-standard worktop sizes and the worktops for these can be found on the pages displaying that collection.

800 Vanity

1200 Vanity

## 2. Select a Worktop:

Once you've chosen your vanity, take a look at our Vanity Worktops to find the corresponding worktop size for your vanity unit.

The dimensions listed in the charts serve as a general guide. Worktop sizes may not perfectly match the dimensions of the vanity, but we've designed them to accommodate a variety of worktop options with a slight overhang.

# Calypstone Aura Worktops

Calypstone Aura solid surface worktops are made from a composite material comprising a natural compound and a high-quality acrylic based polymer binder which creates a surface with the look and feel of natural stone such as granite and marble. It is warm to the touch, 100% nonporous and has the benefit of being able to be cut, sawn, shaped, and worked on using standard woodworking tools.

## Hygienic

The Calypstone Aura material contains an antibacterial agent that destroys bacteria and prevents its growth to act as a disinfectant on its own surface. This makes it perfectly suited to bathroom surfaces, and means it can also be used in healthcare and food preparation areas.

## Durable

You can look forward to many years of service from Calypstone Aura worktops. The material does not degenerate naturally nor fade, and if well cared for, will continue to look as good as the day it was installed.

## Eco Friendly & Non Toxic

Calypstone Aura is made using 40% recycled material and is itself 100% recyclable. It is a fully stable material and cutting and sanding it does not release any volatile or toxic organic compounds into the atmosphere. The material is also self-extinguishing, and in the event of contact with fire, no toxic gases are released

## Easy Clean

The inherent properties of Calypstone Aura make it very easy to clean and maintain. It is resistant to most household chemicals and disinfectants and is best cleaned simply with warm soapy water and then dried and buffed with a soft microfibre cloth.

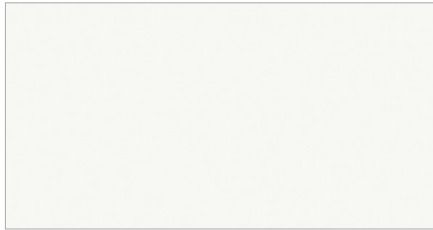

Full care instructions are supplied with each worktop.

# Calypstone Aura Solid Surface Worktops

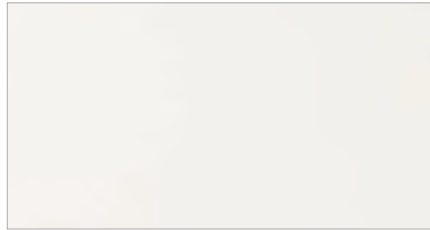

Available in options of 12mm and 18mm thickness, Calypstone Aura Solid Surface Worktop are made from a mixed compound of natural minerals and acrylic resins. This material is the same all the way through, is completely non-porous and the smooth surface is resistant to most domestic chemicals. It can be cut and shaped using standard woodworking tools, and the cut edge sanded and polished to a perfect finish by hand.

## WHAT IS A RIMLESS PAN?

Traditional toilets distribute the flush water through a series of holes around the underside of the rim of the pan. However, the 'Rimless' pan does away with this under-rim, meaning the water can flow faster and with no hindrance to creating an enhanced flush.

The rimless toilet looks no different on the outside. The main difference is that the pan boasts a smooth bowl with reduced areas for bacteria or lime-scale to build up and settle, which makes a significant difference for cleaning and improved hygiene compared to traditional pans.

### HIGHEST STANDARDS OF HYGIENE

No hidden spaces for germs to harbour.  
Allows for easy cleaning.

### PERFECT CLEANING

Unique flush system means the water flows both vertical  
and around the rim covering the entire surface.

### QUIETER & FASTER

Rimless technology allows for a more silent and  
faster flush than standard WC pans.

# How to Order Guide: Overflow Rings

When it comes to basins, getting the details right can make all the difference, especially when you're matching them with brassware and handles. That's where understanding overflow rings becomes essential. These rings not only ensure your basin works properly but also play a role in enhancing its overall look and feel.

Use the table below to find the right overflow for your basin and then choose the colour that best matches your bathroom:

## Basins with no overflow:

These basins do not have an overflow. Therefore, there's no need for an overflow ring. We recommend using a free-flowing unslotted waste with these basins.

## Basins with built-in overflow:

Some basins come with an overflow that is glazed or designed as an integral part of the basin. In such cases, an overflow ring does not apply.

## Basins with a standard overflow:

These basins come with a chrome overflow ring as standard. However, the overflow ring is interchangeable, meaning you can change it to match your bathroom.

## What is an LED Lighting Strip?

Using an LED lighting strip in your bathroom can enhance both functionality and ambiance. You can install LED strips under cabinets to illuminate the countertop, around the back of mirrors for even lighting, or along the ceiling edges to highlight architectural features.

Supplied in three popular length kits, these lighting strips can be cut to fit any size of unit. The special 3M self-adhesive backing tape allows you to stick them to almost any surface with ease.

# Zoned Lighting

Water and electricity are a dangerous combination so when choosing bathroom lights it is essential that you familiarise yourself with two terms; Bathroom Zones and IP Ratings. When purchasing bathroom lights you need to ensure that the fitting you choose has the relevant IP rating for the zone in which it is to be placed. So what are IP Ratings and Bathroom Zones?

IP67. The item is protected from dust and capable of withstanding water immersion upto 1 meter for 30 minutes.

**ZONE 0** Covers the areas inside the bath or shower tray. If you decide to illuminate this area the fittings must be low voltage and must have a minimum rating of IP67 making them immersion proof.

**ZONE 1** Incorporates the area directly above the bath or shower tray to a height of 2.25m from the floor. A light with a minimum IP44 rating is required for this area. If the light uses a 240V supply, a 30ma RCD (residual current device) must be used to protect the circuit in this zone.

**ZONE 2** Covers the area 0.6M outside the bath's perimeter and to a height of 2.25M from the floor. As with Zone 1, a minimum IP44 rating is required for this area.

**ZONE 3** Outside zones cover areas which fall outside of zones 0,1 and 2 and are well away from any contact with water. No IP ratings are required for light fittings in this area.

Installation must be made in accordance with the current IEE wiring regulations and relevant building regulations. Calypso recommends that all electrical bathroom products should only be fitted by a suitably qualified Part P registered electrician.

## Important Notes

It is important when ordering and booking installations that sufficient time is allowed between product delivery date and installation date. This is for the checking of goods and if required, the re-delivery of any rejected or damaged items.

All carcasses are supplied ready assembled, with door and fascia panels packed separately for fitting once carcasses are installed to help avoid damage. Door and drawer fronts are supplied undrilled for handles to give maximum flexibility and choice.

Due to space restrictions on slimline units, the rear legs should be removed to run a soil pipe through, and rigidity is maintained by the front legs and wall fixing.  
All our concealed WC cisterns are suitable for front access servicing. If other manufacturer's concealed cisterns are used, service access may become a problem.

Prices in this catalogue include VAT at 20%.

## Taking Care of Your Calypso Products

By following some simple care and cleaning guidelines, Calypso products can be expected to give many years of enjoyable, trouble-free service.

Calypso bathroom furniture is designed to be used within domestic environments. As with all timber products, adequate ventilation is key and your bathroom furniture will be adversely affected if subject to excessive moisture on the surface or in the atmosphere. It is strongly recommended that a suitable bathroom extractor fan is installed to prevent condensation building up and to prevent damage to the furniture.

Calypso timber based fitted furniture should only be installed within a well ventilated bathroom environment and is NOT suitable for installation in wet-rooms.

It is most important that any cut or exposed panel edge, and any floor or wall abutment with furniture or sanitaryware, must be sealed

with a waterproof sealant such as silicone or similar to avoid the possibility of water ingress and damage.

All water spills and sprays must be wiped clean and mopped dry immediately to prevent water marks or other damage.

Never use chemical or abrasive cleaners, bleach or furniture polishes on any bathroom furniture as the finish can be affected. Clean only with a soft damp cloth and a mild soap solution as necessary.

Solid Oak is a very hard-wearing material and its looks are enhanced with wear over the years. Occasional application of a wax-based furniture polish should be all that is needed to maintain its finish. DO NOT USE household cleaners or abrasive powders on oak, and remove any spills or stains immediately with a soft damp cloth and mild detergent (washing-up liquid). Excessive moisture or water spills will darken the oak surface.

CERAMIC SANITARYWARE - Clean with a damp cloth and warm soapy water. Rinse with clean water and polish with a soft cloth. Avoid using cleaners that contain abrasive solvents, acid or ammonia.

BRASSWARE - Clean with a damp cloth, rinse clean and polish with a dry cloth. Avoid using cleaners that contain abrasive solvents, acid or ammonia.

COLOUR REPRODUCTION - Colour reproduction is as accurate as possible within the limitations of the printing process. A free sample service is provided if you are unsure about the finish on your selected product. Please call sales on 01432 367 367 to order. Also note, colours will vary under artificial light.
